

Amendments to the Specification

Please replace the paragraph at page 7, beginning at line 26, under the heading SUMMARY OF THE INVENTION with the following:

According to the invention, there is provided a hybrid maize plant, designated as X1139Y, produced by crossing two Pioneer Hi-Bred International, Inc. proprietary inbred maize lines GE565937 and GE502199. These lines, deposited with the American Type Culture Collection, (ATCC), Manassas, Virginia 20110, have accession number [[____]]PTA-5523 for GE565937 and accession number [[____]]PTA-607 for GE502199. This invention thus relates to the hybrid seed X1139Y, the hybrid plant produced from the seed, and variants, mutants and trivial modifications of hybrid X1139Y. This invention also relates to methods for producing a maize plant containing in its genetic material one or more transgenes and to the transgenic maize plants produced by that method. This invention further relates to methods for producing maize lines derived from hybrid maize line X1139Y and to the maize lines derived by the use of those methods. This hybrid maize plant is characterized by good yield and stable performance with excellent plant health and disease tolerance.

Please replace the paragraph at page 54, beginning at line 2, under the heading DEPOSITS with the following:
